BEE/ HDI / SMME STATUS

Bee Definitions and Concepts

The BEE Commission defined **BEE** as a strategy aimed at substantially increasing black participation at all levels in the economy. BEE is aimed at redressing the imbalances of the past by seeking to substantially and equitably transfer ownership, management and proportionate control of South Africa's financial and economic resources to the majority of its citizens. It also aims to ensure broader and meaningful participation in the economy by black people.

A black company is seen as one which is 50,1% owned by black persons and where there is substantial management control. Ownership refers to economic interest while management refers to the membership of any board or similar governing body of the enterprise.

A black empowered company is one that is at least 25.1% owned by black persons and where there is substantial management control. Ownership refers to economic interests. Management refers to executive directors. This is whether black enterprise has control or not.

A black woman-owned enterprise is one with at least 50% representation of black women within the black equity and management portion.

A community or broad-based enterprise has an empowerment shareholder who represents a broad base of members such as a local community or where the benefits support a target group, for example black women, people living with disabilities, the youth and workers. Shares are held via direct equity, non-profit organisations and trusts.

A co-operative or collective enterprise is an autonomous association of people who voluntarily join together to meet their economic, social and cultural needs and aspirations through the formation of a jointly-owned enterprise and democratically controlled enterprise.

(Please note that information supplied must be reliable and true)
